

Introduction project *Green-X**

* funded by the EC DG RESEARCH (FWP 5)
Contract No: ENG2-CT-2002-00607

Objective of the Project **Green-X**

- To facilitate a significant increase of RES-E with **minimal costs to European citizen** by developing a dynamic toolbox **Green-X**
 - Identify most important strategies for RES-E
 - Find efficient und sustainable instruments integrating RES-E, CHP, DSM and GHG-reduction
 - Disseminate the toolbox and the results to key stakeholders and policymakers

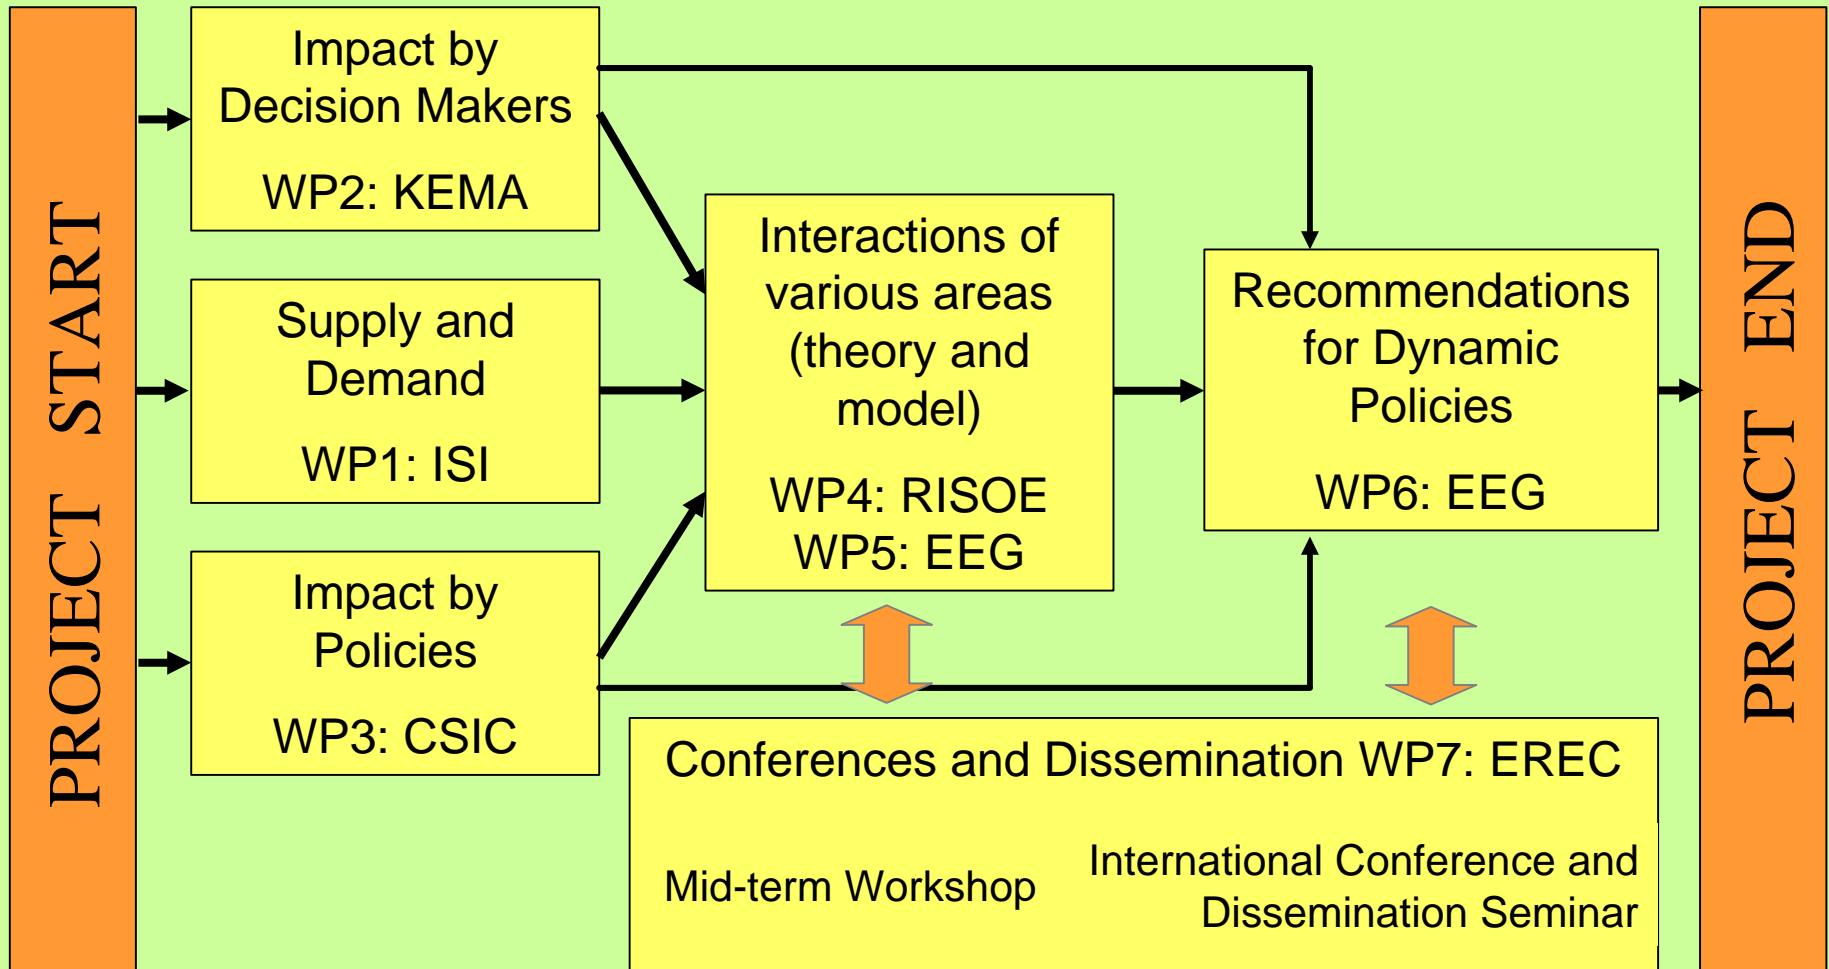

Project Consortium

Overview Project Work Packages

Product

Toolbox *Green-X*

Computer model

Database

RES-E generation

con. electricity generation

CHP generation

Demand side activities

Recommendations

WP 2 (Decision making by stakeholders)

WP 3 (Evaluation of promotion strategies and barriers)

WP 4 (Trade-offs, Interactions)

WP 6 (results of the simulation with the help of the toolbox *Green-X*)

WP 7 (Discussions at conferences and dissemination activities)

Dissemination

Conferences and dissemination seminars

Reports

CD containing the toolbox *Green-X*
